

Query to create a database and create a table in the database

```
CREATE DATABASE Bakery;  
USE Bakery;
```

```
CREATE TABLE Sweet(  
  id INT NOT NULL,  
  item_name VARCHAR(50) NOT NULL,  
  price FLOAT(2)  
);
```

```
CREATE TABLE Savoury(  
  id INT NOT NULL,  
  item_name VARCHAR(50) NOT NULL,  
  price FLOAT(2),  
  main_ingredient VARCHAR(50)  
);
```

Inserting values into the tables

```
INSERT INTO Sweet(id, item_name, price)  
VALUES  
(1, 'doughnut', 0.50),  
(2, 'crossaint', 0.5),  
(3, 'pain au chocolat', 0.55),  
(4, 'cinnamon twirl', 0.45),  
(5, 'cannoli', 0.88),  
(6, 'apple tart', 1.12);
```

```
INSERT INTO Savoury(id, item_name, price, main_ingredient)  
VALUES  
(1, 'meat pie', 1.25, 'pork'),  
(2, 'sausage roll', 1.00, null),  
(3, 'pastry', 2.45, 'beef');
```

Results

Table sweets

	id	item_name	price
	1	doughnut	0.5
	2	crossaint	0.5
	3	pain au chocolat	0.55
	4	cinnamon swirl	0.45
	5	cannoli	0.88
	6	apple tart	1.12

Table Savoury

	id	item_name	price	main_ingredient
	1	meat pie	1.25	pork
	2	sausage roll	1	NULL
	3	pastry	2.45	beef
